

American **D4T**

DYNAMIC MICROPHONE

A QUALITY, LOW-PRICED, MOVING-COIL MICROPHONE. For general use where clear speech and natural music reproduction is required. This new AMERICAN microphone is a very efficient instrument, having a broad range, from 60 to 7500 c.p.s., and high output of 56db (0 db=1v/bar). While designed for maximum ruggedness, it is of convenient size and reflects beauty in modern lines. The utility value lies not only in the quality and type of response but also in mechanical features, such as light weight (approximately 10½ oz.), a full 180° vertical angular setting, and positive friction lock at the swivel.

The **D4T**, high impedance, is equipped with a single-contact, shielded plug. The 50, 200 and 500 ohm models are equipped with a two-conductor plug and have a balanced line out.

The **D4T** models, output impedances of 200, 500 and 38,000 ohms (high impedance), have a high permeability core transformer enclosed in the case.

The **D4** model is of voice-coil impedance, approximately 30 ohms. Lines up to several hundred feet may be used on all models except the high impedance, where line should be restricted.

The complete assembly includes 12½ feet of shielded, rubber-covered cable and shielded plug. Finished in platinum chrome. Standard mounting, ⅝" x 27 thread.

D4T Dynamic (38,000 ohms) Code: DFORT LIST PRICE **\$20.00**
Available on order in 200 or 500 ohms LIST PRICE **\$20.00**
Complete with 12½' Cable

D4 Dynamic (30-50 ohms) Code: DEFOR LIST PRICE **\$18.00**
Complete with 12½' Cable

Average response of the D4 and D4T Dynamic Microphones for normal incident sound.
