CONDENSER MICROPHONES

CAPPS stretched diaphragm CONDENSER MICROPHONES are acoustically faithful, distortion free, omnidirectional, blast proofed, and have a smooth frequency response from 20 to 20,000 c.p.s. Their excellent transient response made them ideal for those who must have the ultimate in acoustical transmission. They are gracefully styled in soft satin and grey finishes and are complete with preamplifier, power supply and cable. CM 2001 "PROFESSIONAL." The lowest priced condenser microphone available. Combines all of the features above with low cost achieved through mass production. Available for high impedance input (Grid Input). A boon to high fidelity enthusiasts and professional users.

CM 2001 Net Price \$125.00*

CAPPS "STUDIO" Condenser Microphones are completely equipped with Cannon Connectors and are built ruggedly to withstand the hazards of continuous studio use. Available in several impedances as follows:

CM 2030A—30 Ohms Net Price \$225.00*

CM 2250A—250 Ohms Net Price \$225.00*

CM 2011A—HI Imp. (Mic Input) Net Price \$225.00*
