

NEW REMLER CONDENSER MICROPHONE

A NEW condenser microphone of radically new design has been produced by the Remler Company, Ltd., and is illustrated in the photograph to the left. The completed unit comprises, in addition to the microphone, a complete amplifier in the same housing to facilitate its use. The parts of the unit are as follows: the connection block, known as the suspension converter, is indicated at (1); the head housing at (2); the front view of the transmitter head at (3); the complete assembly at (4); and the pre-amplifier between microphone and line at (5).

The completed unit has a response which is substantially flat between 40 and 10,000 cycles per second, and is equipped with a combination 50- and 200-ohm output unit.

Left, components of the Remler microphone; and right, complete assembly.
