UNIVERSAL MODEL "E" CONDENSER MICROPHONE

For Highest Quality Broadcasting and Recording

Assembled. Ready for use as Shown. A 2-stage amplifier using No. 230 tubes. Absolutely does away with batteries and renewal costs. Just plug Model "E" into 110-V. A.C. 50-60 cy. socket and you are ready to operate. No complicated connections, anyone can install in an instant. Absolutely no hum or ripple, guaranteed as quiet as batteries. Output perfect for recording on either film or discs.

Frequency response from 35 to 10,000 cycles. Output greater than from a standard two-button carbon microphone (—32 D.B.). Connect to standard input transformers where carbon microphones have previously been used. Head has automatic barometric adjustment and diaphragm is protected by a solid cast grating. Ninety degree swivel of head permits use directly overhead. The bail, as shown, allows hanging by wire or cord. Twenty-five feet of rubber-covered, shielded cable furnished. Without tubes. Black Crackle finish.
